                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       on:
  Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Score

-!- SUBURIT: Multimeric.
-!- SUBCELIULAR LOCATION: Secreted.
-!- TISSUE SPECIFICITY: COLON, SWALL INTESTINE, COLONIC TUMORS,
-!- TISSUE SPECIFICITY: COLON, SWALL INTESTINE, COLONIC TUMORS,
--- BRONCHUS, CERVIX AND GALL BLADDER.
-!- PTM: ALL CYSTEINE RESIDUES ARE INVOLVED IN INTRACHAIN OR
INTERCHAIN DISULFIDE BONDS (BY SIMILARITY).
--- POLYMORPHISM: The number of repeats is highly polymorphic and
varies among different allels.
--- SIMILARITY: Contains 1 C-terminal cystine knot-like (CTCK) domain
--- SIMILARITY: Contains 1 TIL (Trypsin inhibitory-like) domain.
--- SIMILARITY: Contains 2 VWFC domains.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        TISSUB=Intestine;

Chem. 272:16873-16883 (1997).

FUNCTION: Salivary mucin that is thought to contribute to the lubricating and viscoelastic properties of whole saliva.

SUBCELLULAR LOCATION: Secreted.

TISSUE SPECIFICITY: Expressed mainly in bronchus glands and also in submaxillary glands, endocervix, gall bladder, and pancreas.

PTM: Highly glycosylated.

PTM: Highly glycosylated.

SIMILARITY: Contains 1 TIL (Trypsin inhibitory-like) domain.

SIMILARITY: Contains 3 VWFC domains.

SIMILARITY: Contains 4 VWFD domains.

SIMILARITY: Contains 1 C-terminal cystine knot-like (CTCK) domain.
